SUMMARY

Detail-oriented PHP Developer with 4.5 years of experience in backend development, primarily focused on ERP systems. Demonstrated expertise in building scalable, secure, and high-performance web applications, with hands-on experience in designing and maintaining core ERP functionalities and supporting diverse project requirements. Adept at collaborating with cross-functional teams, optimizing code for efficiency, and solving complex technical issues. Committed to writing clean, maintainable code and continuously enhancing development practices. Highly motivated, with a strong inclination toward learning emerging technologies and conducting technical research.

TECHNICAL SKILLS

PHP (CodeIgniter)	REST API	JWT , OAuth
MySQL	Linux Servers	Research & Technical Analysis
JavaScript , jQuery	Python	Version Control (Git)
HTML	Ajax	Postman
CSS	Cron Jobs	cURL
Tailwind	Web Sockets	JSON
MVC Architecture	Jenkins	System Design / Architecture
Documentation	Requirements Analysis	Payment Gateway Integrations

PROFESSIONAL EXPERIENCE

Software Developer, Caxigo Technologies Pvt Ltd Dec 2020 - Present

- Developed and maintained scalable RESTful APIs and backend services using PHP and the CodeIgniter framework, enabling seamless data integration, third-party service communication, and secure user authentication.
- Led the end-to-end design and development of multiple ERP modules, building features from the ground up.
- Developed a comprehensive school management system supporting two-way messaging, announcements, appointment booking, and online payments.
- Led performance tuning efforts for the ERP system by optimizing MySQL queries and server settings, resulting in improved system responsiveness and reduced load times.
- Led the development of multiple eCommerce applications, overseeing end-to-end implementation including product management, order processing, payment integration, and user experience optimization.
- Headed the design and development of a foreign currency exchange application, focusing on real-time rate updates, secure transaction processing, and regulatory compliance.
- Developed a wide range of web applications and APIs, contributing to both frontend and backend functionality with a focus on performance and user experience.
- Configured Linux servers from the ground up for application deployment, including MySQL replication setup and cron-job management for automated tasks.
- Served as the primary point of contact for technical research, identifying optimal technologies and approaches for project implementation.
- Collaborated with cross-functional teams including frontend developers, QA engineers, and product managers to deliver features on time and with high reliability.

- Implemented logging and monitoring solutions to proactively identify issues and optimize system uptime
- Troubleshoot and resolved production issues under tight deadlines, improving system stability and user satisfaction.
- Mentored junior developers by sharing knowledge, reviewing code, and guiding them through development best practices.

Software Developer Intern, Finedge IT Solutions Dec 2019 - July 2020

- Designed and developed academic projects using Python/ Django and MySQL
- Coordinated testing and validation, ensuring compliance with industry standards.
- Provided technical expertise, contributing to a 15% reduction in system failures.

EDUCATION

Bachelors of Science in Computer Science Sep 2016 -May 2019

University Of Calicut

- Relevant coursework in Computer Science.

Higher Secondary Education June 2013 -April 2015

Rahmania Higher Secondary School, Calicut

High School Education Class of April 2013

Silver Hills Higher Secondary School, Calicut

ADDITIONAL INFORMATION

- **Languages:** English, Malayalam, Hindi, Tamil (Conversational).
- **Date Of Birth :** 31 August 1997
- **Nationality:** Indian
- **Relationship Status:** Single
- **Current Location:** Kozhikode, Kerala (Willing to relocate)
- **Passport Status:** Valid Indian Passport
